

Request for Proposals for parking lot lighting

The Rural Municipality of Miltonvale Park seeks proposals to install four exterior lights to illuminate the parking lot at the Miltonvale Community Park at 413 Sleepy Hollow Road, Milton Station, to improve the safety and accessibility of the Park. The budget is approximately \$40,000, and value for money would be a consideration. We also intend to pave some of the parking lot, and the trail that goes around the building and past the playgrounds, dog run and ball field), so may need to coordinate wiring with the paving, (and if there is extra money -we will pave more!).

The aim is to light the parking lot and towards the shelter and park area, a bit, if possible.

The electrical panel was recently upgraded to allow for the EV chargers.

The work must be completed by September 15, 2025 – but earlier is better.

Council intends to meet on Wednesday, July 16 to choose a contractor.

Questions may be addressed to COA Shari MacDonald admin@miltonvalepark.com or 902-368-3090. The park shelter should be open M-F 9-6 and Saturdays and Sundays 12-4, If you would like a site visit.
